

SAP BO – Advanced Report Creation for 4.x

Software	Duration	Delivery Type	Book & Further Info
SAP Business Objects 4.x	1 Day	<ul style="list-style-type: none"> Remote 	Sales enquiries@ioanalytics.co.uk

This 1-day course is designed to enhance and advance your Web Intelligence skills. You will learn advanced query techniques, including subqueries, combined queries and synchronising retrieval from multiple data sources. You will also learn how to manipulate calculation contexts, to create complex formulas (with nested functions and IF logic), as well as implementing other useful reporting features, such as tracking changes in data.

Course Contents

- Lesson 1: Advanced Queries**
 Combo Queries, Sub-Queries
- Lesson 2: Switching Data Sources**
 Switching objects between Universes
- Lesson 3: Data Merging**
 Multiple Blocks from the same Query
 Multiple Blocks from different queries
